

Congratulations on your new puppy!

This will be an exciting time for you and your family. It will also be a time filled with a lot of questions & concerns. Here at Macon County Veterinary Hospital, we want to help you answer those questions and make this new adventure a smooth and happy one for you and your puppy.

This packet will help with the first year of your puppies life. From vaccine schedules, feeding to heartworm disease and spaying/neutering. We want to help you start and maintain a healthy lifestyle for you and your puppy.

Dr. Miller, Dr. Ramsy, Dr. Sellers, and the staff are so happy you and your puppy are now a part of our family

Thank you for trusting Macon County Veterinary Hospital for all your pet's needs.

Recommended Canine Vaccination Schedule

Puppies- It is recommended that puppies receive their first DA2PCPV at 6-8 weeks of age.

DA2PCPV stands for

- ***Distemper*** (viral/neurological disease)
- ***Adenovirus2*** (Hepatitis)
- ***Parvovirus*** (Parvo)
- ***Parainfluenza*** (Flu)

Puppies need to continue to receive these vaccines every 3-4 weeks for a total of 4 vaccines. The following is a schedule of what each puppy will get at each of the 4 visits.

*****1st VISIT (6-8 Weeks) *****

*Complete Physical Exam
DA2PCPV Vaccine
Fecal Analysis and Deworming*

*****2nd VISIT (9-12 Weeks) *****

*DA2PCPV Booster
Fecal Analysis and Deworming
Begin Heartworm, Flea & Tick Prevention*

*****3rd VISIT (13-16 weeks) *****

*DA2PCPV Booster
Bordatella (Kennel Cough)*

*****4th VISIT (17-20 Weeks) *****

*DA2PCPV Booster
1 YR. Rabies Vaccine
Schedule Spay or Neuter*

After the 4th visit, your pet should see us for their Annual Visit which includes a Complete Physical Exam, DA2PCPV, Bordatella, Rabies Vaccine, Fecal Analysis and Deworming and Heartworm Test
