

Congratulations on your new kitten!! This will be an exciting time for you and your family. It will also be a time filled with many questions & concerns. Here at Macon County Veterinary Hospital want to help you answer those questions and make this new adventure a smooth and happy one for you and your kitten. This packet will help with the first year of your kittens' life. From vaccine schedules to feeding. From dental care to spay and neutering. We want to help you start and maintain a healthy lifestyle for you and your kitten.

Dr. Miller, Dr. Ramsy, and staff are so happy you and your kitten are now a part of our family. Thank you for trusting Macon County Veterinary Hospital for all your pets needs

Recommended Feline Vaccination Schedule

Kittens- It is recommended that kittens receive their first **FVRCP** at 6-9 weeks of age.

FVRCP stands for

Feline Rhinotracheitis and **Calicivirus**

Panleukopenia

Chlamydia

Kittens need to continue to receive these vaccines **every 3-4 weeks** for a **series of 3 sets**. The following is the schedule of what each kitten will get at each of the 3 visits.

****1st VISIT (6-9 Weeks) ****

Complete Physical Exam

Feline Leukemia/Feline Immunodeficiency Test

FVRCP Vaccine

Fecal Analysis and Deworming

****2nd VISIT (9-13 Weeks) ****
